

**Education that is centered
on You.**

**The best students learn
beyond the technical.**

**We support your freedom to
learn. Ask us questions and
let's act on the answers.**

At Central Colleges, we are centered on the holistic formation of each student towards integrity and excellence as a community centric professionals.

About.....

Central Colleges is a private technical institution providing learner-centered education in a supportive learning environment to aspiring professionals. We give our students freedom to learn by offering interactive and flexible learning opportunities rooted in strong mentorship and an open community culture.

We exist because we believe that students reach their fullest potential when they're given the space to explore and enrich themselves.

Online Classes

Central Colleges will offer distance learning for the sake of our students' health and safety. Thus, purely online classes with synchronous (real-time) sessions and asynchronous (moderately supervised) sessions will be employed.

Requirements

Students are strongly encouraged to have a laptop/tablet/smartphone and stable internet connection.

Platforms

Students shall receive regular online instruction through Google Classroom. Google Drive and Google Mail will be utilized for file sharing, and Google Meet/Zoom/Messenger Rooms for video conferencing and consultation.

Schedules

Synchronous learning or real-time online interaction will be at least 1.5 hours lecture (for every 3-unit course) per week or a maximum of 3 to 4.5 hours per day.

Asynchronous learning will also be provided to give time for students to access recorded presentations, modules, and other educational materials, and finish required tasks on their own time.

The freedom to learn starts here.

Programs

Starting from its origin as a premier technical school, Central Colleges aims to develop forward looking thinkers. With that, the school is proud to offer the following programs for this School Year:

..... Graduate Studies

Masters in Business Administration

is a two-year graduate programme designed for students who wish to progress to more senior and leadership roles in business.

The programme immerses students in a world of academic thought, current business practice and applied projects.

This is an online taught programme delivered by world class faculty complemented by guest business practitioners.

Two-Year Thesis and Non Thesis Programs are available.

Graduate Studies

Masters in Public Administration

is a two-year graduate program designed to equip students with administrative and management concepts useful in formulating solutions to problems associated with public office and nonprofit administration.

It also aims to enhance the students' research capability in the areas of public administration and contemporary issues in public affairs management. The program also exposes them to current issues in public administration as well as to the practical application of various skills and techniques in the field.

Two-Year Thesis and Non Thesis Programs are available.
